

KCE Electronics Public Company Limited

Environmental Policy

Environmental Policy

KCE Electronics Public Company Limited, a manufacturer and exporter of printed circuit boards (PCBs), is committed to establishing an effective Environmental Management System (EMS) and to continuously improving environmental performance across all environmental aspects. The company shall comply with the following principles:

- Comply with applicable environmental laws, regulations, other compliance obligations, and environmental risk management requirements, including customer requirements and the expectations of relevant interested parties.
- Reduce waste generated from manufacturing processes and utilize natural resources, energy, and water efficiently in order to promote sustainable resource use and minimize environmental impacts.
- Committed to developing and increasing the proportion of renewable energy, water, and raw materials, alongside their efficient management.
- Reduce greenhouse gas emissions from our operations to mitigate the impacts of climate change.
- Commit to protecting the environment, preventing, and controlling pollution in air, water, and soil; while promoting sustainable resource use alongside climate change mitigation, and protecting ecosystems and biodiversity.
- Evaluate and continually improve the environmental management system through regular monitoring and review of environmental performance to ensure that established environmental objectives and targets are achieved.
- Operate and continually improve the environmental management system to elevate environmental performance in accordance with customer specific requirements and applicable laws.
- Promote environmental awareness, knowledge, and responsibility among employees, contractors, suppliers, and all interested parties throughout the entire supply chain.

(Mr. Pitharn Ongkosit)

President and Chief Executive Officer
